

Fort Collins Vein Specialist Celebrates 2,000 Successes

Dr. Steven Kaufman, owner and general surgeon of Total Vein Care in Fort Collins, CO celebrates just over 2,000 patient successes using a virtually painless treatment option—the Venefit system.

(PRWEB) March 05, 2013

Dr. Kaufman, Northern Colorado's most experienced vein care specialist, has now performed over 2,000 virtually painless vein care procedures with the Venefit system, formerly known as VNUS ClosureFast. Although his clinic offers a full range of treatment options for best customer service, he has recognized the Venefit system for its innovative, state-of-the-art procedure and incredible benefits for patients.

The Venefit procedure is a minimally invasive, extremely effective treatment option that uses radiofrequency energy, applying even, targeted heat that tightens the collagen in affected vein walls. It is a clinically-proven, patient-friendly procedure that treats varicose veins and their underlying cause—venous reflux.

The Venefit system has a 97.2% success rate and patients report little if any pain during and after the procedure. According to Dr. Kaufman, "The procedure is quick, and most patients are able to drive themselves home after the surgery. Most can return to regular activities immediately, and some no later than the day after surgery."

Dr. Kaufman is the founder of Total Vein Care, which is located at 1136 E Stuart Street, Suite 4102 Fort Collins, CO 80525. Dr. Kaufman can be contacted at 970-498-8346. Although Total Vein Care is based in Fort Collins, they are committed to treating patients all over Colorado and beyond.
