

Michael Shenk Joins Total Vein Care Team – A Showcase of His Professional Experience and Education; Leading to His Objectives in This New Position

Michael Shenk is our latest addition to the Total Vein Care staff. He joins the team as a Medical Assistant. Shenk brings knowledge and a wide range of experiences to our care center. His education is founded on his degree from Colorado State University, a Pre-Med Specialization, Bachelor of Science in Biological Science.

Fort Collins, CO (PRWEB) November 15, 2012

Michael Shenk is our latest addition to the Total Vein Care staff. Shenk brings knowledge and a wide range of experiences to our care center. His education from Colorado State University, a Pre-Med Specialization, Bachelor of Science in Biological Science, gives him a strong medical foundation. Specific skills he has acquired outside of his Bachelor's Degree include: clinical EMR experience, Intravenous Therapy Certification, State Certification as an EMT-B, and National Registration as an EMT-B. At Colorado State University, Shenk was hired as a Research Associate for three years, gaining valuable experience. He also served as a medical assistant at Fort Collins Primary Care before signing on with Total Vein Care. Overall, his objectives will be fulfilled by working at Total Vein Care, a highly reputable medical facility where his professional skills can be applied and refined.

Dr. Kauffman is enthused by this new addition, "I couldn't be happier for Michael Shrink's decision to join our team. He brings a well-educated perspective to our care center." He joins the team as a medical assistant along with current staff including: Paula Figgs, Practice Administrator; Elise Hinnegan, Insurance and Billing Specialist; Nikki Stedman, Lead Medical Assistant; Angela Thiel and Becky Swanborn, Sonographers/Ultrasound techs; and Dr. Kauffman, Registered Physician in Vascular Interpretation.

Through this hire, Total Vein Care is able to expand our services to more patients. With the quality of experience on our team, we pride ourselves in offering our patients the highest quality care, at affordable rates. We are routinely offering free screenings to patients where Dr. Kauffman will review your medical history with you, conduct a physical examination, and discuss the next steps. As a team, our staff is highly trained and concerned about the comfort and outcome of every patient case.

Therefore, we are pleased to announce our projected growth in services and believe that Michael Shenk's professional experience has equipped him to make a smooth transition into our Total Vein Care team. We have high expectations for Shenk's success at Total Vein Care and are excited about the present direction of our medical facility. Listen for more information about Total Vein Care on public radio soon!
