

Total Vein Care Attends World UIP Conference

First ever World UIP Conference held in the United States attended by Fort Collins physician.

(PRWEB) October 29, 2013

In September, Dr. Steven Kaufman of Total Vein Care Center in Fort Collins, Colorado attended the World International Union of Phlebology conference in Boston, Massachusetts. This conference, first ever in the US, using discussion panels, speakers, and hands-on workshops, provides attendees with the latest information on vein disease diagnosis and treatment. TVC maintains a continual commitment to gathering information that will help provide better health care for patients and the community.

More than 300 internationally recognized faculty, representatives from all over the world and delegates from more than 25 international phlebological societies participated in this historic event, providing an international perspective unmatched by any other venous meeting this year. Fort Collins physician, Dr. Steven Kaufman commented, "The opportunity to meet with other vein specialists allows Total Vein Care to stay at the edge of venous treatment technology and to bring new treatment ideas to patients in the Northern Colorado area."

Dr. Steven Kaufman, founder of Total Vein Care views this conference as an important part of the TVC's commitment to providing patients with the best care possible. "This meeting and the many interactions I had allows Total Vein Care to stay abreast of the latest research and advances in venous insufficiency treatment. I am always reminded of my purpose as a physician who is dedicated full-time to this specialty that I need to bring new treatment capabilities to my patients, based upon the latest research and practice in vein treatment. My patients depend on me to deliver the best care available."

The disease of chronic venous insufficiency can leading to physical discomfort caused by varicose veins and spider veins. Extremely common in men and women, chronic venous insufficiency affects over half the U.S. population at some point in their lives. While spider veins are very small, reddish veins on the surface of the skin, varicose veins are much larger, bulging, tangled veins that may appear bluish in color. These conditions, caused by venous insufficiency, are treatable and most of the time covered by the individual's health insurance.

About Total Vein Care

Total Vein Care is a comprehensive vein treatment facility in Fort Collins, Colorado that serves clients from Colorado and beyond. The center specializes in treating varicose veins, spider veins, and other types of vein disease using advanced and minimally invasive techniques. Licensed in Colorado and Wyoming, Dr. Kaufman is a Fellow of the American College of Surgeons, and a member of several professional societies, including the American Venous Forum, the American College of Phlebology, the American Medical Association, and the Colorado and Larimer County Medical Societies.
